

INTERNATIONAL

FASTENER EXPO

Returns to Las Vegas for Their 2023 Show

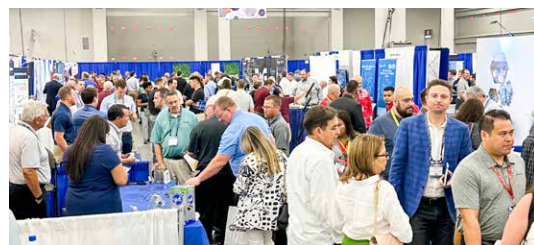

The International Fastener Expo (IFE), the largest North American B2B Expo focused on the Fastener industry, will be hosting their annual event October 9-11, 2023, at Mandalay Bay in Las Vegas. Attendees and exhibitors from around the world will come together under one roof to build new relationships and connect with peers, discover the latest products and solutions, and learn from experts about trends and newest technologies being used in the industry. IFE 2023 is expected to bring 650+ exhibitors to the Expo Floor representing a strong global fastener footprint; the 2022 show had exhibitors from 37 different countries.

This year's show will feature special events like the always popular golf tournament at the Bali Hai Golf Club, the fun-filled Welcome Reception at Mandalay Bay's Daylight Pool, and the honorary tradition of inducting the Hall of Fame award winners and Young Fastener Professional of the Year. IFE 2023 will once again be partnering with Fastener Training Institute to provide a full-day class "Fastener Fundamentals – The Nuts and Bolts for Fastener Professionals," led by FTI instructor, Carmen Vertullo.

An energizing keynote speaker will take to the stage to kick off the show presenting a highly relevant speech. Additional educational opportunities will take place throughout October 10 and 11 on the Expo Hall Session Stage, offering attendees strategic, forward-thinking knowledge on topics that included risk management, technology and digitalization, succession planning, fastener finishings, and more. A new educational format will be introduced at IFE 2023, Fireside Chats. These microlearning sessions will provide the audience with engaging and interactive interview-style discussions.

IFE 2023 will also provide attendees and exhibitors with the official mobile event app and "smart" matchmaking technology, IFE Match.

Registration is set to open on Thursday, June 1. Visit <https://fastenershows.com/you-cant-miss-ife-2023-fti/> for updates and complete details.

Special Rivets Corp.

6 Billion Blind Rivets Annual Production Meets U.S. and Global Demand

INTERNATIONAL
FASTENER
EXPO | Booth No.
611

Special Rivets Corp. (SRC) is one of the top developers and manufacturers of full-line blind rivets, rivet nuts and high quality labor-saving riveting tools. They are also one of the largest rivet manufacturers in Asia. In addition to their China plant, they've opened a new plant in Thailand in 2022. They currently produce over 500 million blind rivets and 100,000 riveting tools per month. Over the past 40 years, they have sold to more than 150 countries and accumulated more than 700 customers worldwide.

Ad at page 14

Eyeing Thailand, Targeting 300 Million Local Blind Rivet Monthly Production

SRC sees the worth of Thailand Prime Minister's ambition to develop Thailand as the top manufacturing nation of automobiles in Southeast Asia. Plus, they have many clients who identify Thailand as a key market in Southeast Asia. Therefore, they have opened a new 45,000 square meter plant in Thailand to meet the increased demand for their products in the U.S., Europe, Southeast Asia and around the world. The new plant has 50% of area currently in use and has about 110 auto-forming machines which will be increased to 300. At this stage, they are aiming at a monthly capacity of 100 million pieces of rivets for the Thailand plant, and planning to increase to 300 million pieces of rivets in the future.

Anticipating U.S. Market Recovery and Local Sales Boost

SRC products are mainly sold to the U.S., Europe, New Zealand, Africa, Latin America and Southeast Asia, with the U.S. accounting for up to 30% of the total sales. As trade and economic ties between the U.S., Europe and Taiwan have grown in recent years, SRC is looking forward to exporting their products. With a fully automated warehousing and retrieval system, they can ensure orders are fulfilled accurately and quickly. An SRC representative said: "We are rooted in quality and credibility and we deploy globally. Every client is important to us. In the face of market challenges, we will stick to the belief that makes us who we are and continue to create new markets."

CLH

Chin Lih Hsing Precision Enterprise Co., Ltd.

Contact: Ms. Mandy Wang

Email: clh@clh.com.tw

Ad at page 55

With extraordinary craftsmanship in machining, Chin Lih Hsing works closely with international auto parts companies and sells up to 90% of its automotive fasteners to the U.S. and Europe. The company takes pride in its ability to customize products based on customers' specific requirements. Their factory is equipped with 200 automatic lathes, 30 CNC lathes, 12 slotting machines and many secondary processing machines. This comprehensive setup enables them to achieve a substantial monthly production capacity of up to 80 million pieces, ensuring a stable supply with unwavering focus on quality and competitive pricing. They continue to pursue high quality and improve process control by adding process control systems to enhance production management. They also continue to invest in quality control equipment, including 11 optical sorting machines and a new 2.5D projector, hoping to enhance their capability through continuous improvement and progression to be the best support for customers.

Threaded Inserts, CNC Parts, Turning Parts

They will display at IFE a wide range of threaded inserts in various materials and sizes, mainly for molding of plastic injection, heatstake, ultrasonic embedment and other applications. In addition, they provide high precision and high quality CNC parts in various materials customizable to customers' drawings. They also have a variety of turning parts for automotive, motorcycle, electronics, connectors, home appliances and various manufacturing industries. By exhibiting, they hope to expand in the North American market, especially in the automotive parts and manufacturing industries, and seek traders, manufacturer and other partners.

Deploying in the U.S. Auto Parts Market

They are locked on the rising demand for parts driven by EVs. Serving the auto parts supply market for more than 15 years and certified to IATF 16949, they are well experienced in machined nuts and bolts among automotive parts. Chin Lih Hsing values the importance of quality requirement and is the best partner for customers looking to expand business.

Direct Access to U.S. Wood Screw Market **Bi-Mirth** to Finish ICC Certification Renewal by Yearend

INTERNATIONAL
FASTENER
EXPO Booth No.
715

Bi-Mirth specializes in the development, production and export of structural wood and concrete fasteners. They have made a name for themselves worldwide with patented quick-drill screws, self-drilling screws, self-tapping screws and wood screws. A quarter of their sales is from the U.S., and they are in the process of renewing U.S. ICC certificates (including AC257 and AC233) in response to U.S. customers' and regulatory requirements. Fastener World was informed by Bi-Mirth that they will finish the renewal by the end of this year, and will provide products and services of the highest quality standards to U.S. customers.

New Product Lineup

In addition to the renewal, they have expanded their product lineup to include fully threaded framing screws, landscaping hex washer head screws, SIP board screws, along with hardwood screws (tackling the toughest type of wood), timber-concrete connector screws (with superior shear resistance), and A2/A4 stainless steel wood screws (tailored for tough environments), which were previously announced in a report by Fastener World. They are going full speed ahead to boost market shares in the U.S., Europe and the world.

Mass Timber Market is on the Rise

Looking ahead, they see a rapidly growing market for mass timber in the US. By exhibiting at IFE, they want to serve existing customers and develop new ones, as well as to find distributors for the mass timber market. Furthermore, with carbon reduction forming a global trend, they are also developing stainless steel solar panel screws, installing solar panels on their own factory roofs, and introducing electrostatic oil filtering machines in their own factories to make a green fastener production line for customers around the world.

L&W

INTERNATIONAL
FASTENER
EXPO

Booth No.
629

L&W is a professional fastener supplier in Taiwan and China. Our fastening products are used in construction, auto-market, machines and general industries.

L&W Supplying:

L&W provides different kinds of standard fastening products according to DIN, ANSI, ISO, BS, JIS and Non-standards customized fasteners per drawing and samples. Our available range of diameter is from #2 up to 4", M1.5 up to M100 by cold forging, hot forging, and lathe machining. The part length is from 2mm up to unlimited.

L&W Product Range

Bolts, Nuts, Washers, Screws, Socket Parts, Stamping Parts/ Assembled Parts, Pins, Auto-Parts, OEM parts.

L&W Material Range

- Carbon Steel Range : SAE C1008 ~ C1040
- Alloy Steel Range: SCM 435, SCM 440, SAE 4140, 40 Cr., 42 Cr.Mo.
- Stainless Steel : 302HQ, 304, 305 , 316, 316L, 316M, 410, 430.
- Brass & Silicon Bronze
- Aluminum 6061, 2024

L&W Sourcing :

We work with hundreds of subcontracted makers in Taiwan, China, Korea and Thailand. By combining outsourcing production capacity, L&W not only combines qualified merchandise but also provides the most comprehensive range of products including Bolts, Nuts, Screws, Washers, Stamping parts, Assembled Parts, Pins and Non-metal parts to customers worldwide.

Contact: Gary Lin
Email: lw.gary@lwfaster.com.tw

Ad at page 108

L&W Service :

Import and export agency services; providing agency services for domestic and foreign companies, namely, goods and services price quotations, bidding quotations, sales promotion and distributorships in the field of metal hardware.

L&W Documents :

Certificate of Origin, Quality Inspection Report, Material Mill Sheet and PPAP #1, #2, #3 and IMDS data offer available.

The mission of L&W is to accomplish one-stop-shopping service for saving import cost and provide good quality products for end users to work more efficiently. In order to offer more competitive service for customers, L&W also invested warehouses in Taiwan and China while carrying out stock programmes for several customers at the same time on specific products. Base on customer's annual demand, our warehouses hold stock for contractual orders and mill supply. We hope to bring more additional value service to customers through our professional inspectors and experienced sales teamwork.

Fong Prean Industrial

Patented "MS Twister" Sweeps the U.S.

INTERNATIONAL
FASTENER
EXPO

Booth No.
978

With 37 years' producing experience and a research and development team operating for over 28 years, Fong Prean is focused on solving problems for end users, specialized in construction screws. For helping customers regarding their product challenges to fulfil market needs, the company has expertise in manufacturing fast-drilling drywall screws and high-quality self drilling screws, and they are also capable of developing custom solutions in collaboration with customers.

Fong Prean continuously innovates to meet the requirements of new building material and power tool. To enhance cross-functional communication, they keep updating equipments, collect data and optimize systems. They leverage electronic systems to ensure efficient capacity control, delivery, production planning and quality assurance. All these improvements are aimed at minimizing errors, maximizing productivity, and meeting various demands effectively.

Flush Finish, Burr-Free and Safe

The patented drywall screw has been introduced to the US market. Fong Prean especially promotes their patented wood screw "MS twister" by exhibition at IFE. This patented MS head screw, tailored for wood, gypsum boards and various panels, provides a flush and burr-free finish to increase work efficiency. It combines with the Twister thread which perform high holding power and low driving torque for wood applications, ensuring safety. Furthermore, the specially designed screw can reduce wear on electric drills and batteries, as well as lower the rate of splitting near the edge and prevent damage to wood.

Cost Reduction for Builders

Fong Prean sees a growing opportunity in residential, infrastructure and non-residential construction in the US. Given the challenges of labor shortages and increasing wages in the country, the company aims to collaborate with builders to develop products that meet market demands, thereby improving work efficiency and reducing labor costs. Fong Prean is dedicated to continuous innovation and actively embraces environment, social and governance (ESG) practices to address the changing commercial landscape and reduce carbon footprint.

SEMS Screws by Chian Yung

Save Time, Reduce Inventory, and Can be Customized

INTERNATIONAL
FASTENER
EXPO

Booth No.
879

With a 1,500 sq. ft. automated plant and quality control facilities in Benjhou Industrial Park, Chian Yung Corporation specializes in the production and development of SEMS screws and knows the characteristics of screws and washers well. SEMS screws in carbon steel/stainless steel/copper/aluminum in lengths of 1/8"- 4" (3mm-108mm) and specifications of #0-1/2" (M1.4-M12) are currently its main products and it also has electroplating, coating and related post-processing capabilities. With the ability to handle a full range of customized orders from global customers while maintaining consistent quality and prompt delivery, Chian Yung has had its SEMS screws highly visible in automotive, electronic, and computer applications.

Chian Yung's SEMS screws have many advantages and features compared to normal screw applications. Customers don't have to spend extra time to assemble screws and washers, greatly reducing the time cost. Customers don't have to purchase screws and washers separately, either, so they don't have to pay attention to quantity and inventory issues at all times. Its production process fully complies with ISO9001:2000 and IATF16949 requirements, and its products fully meet int'l quality standards. It is capable of flexible and customized production to ensure stable quality and on-time delivery.

With nearly 40 years of effort, Chian Yung has maintained close relationships with customers in Europe and the U.S. Through the IFE this year, Chian Yung hopes to gain more trust from customers around the world, further expand business opportunities in the U.S. and its neighboring countries, and get closer to customers' market needs. Chian Yung currently generates nearly 30% of its revenue from the US market, which grew by 30% last year compared to 2011, and the future development is promising.

Chian Yung is open to customers from all industries and welcomes cooperation from domestic and foreign importers, chain stores, large manufacturers, processors, and manufacturers. According to Chian Yung, "Like every small screw, as long as the quality and strength are good, they can play an indispensable role. We will uphold the principle of honesty and pragmatism in dealing with customers, and will not only focus on product customization, but also continue to refine R&D and strengthen services in providing new products to our customers."

Fulfilling the ESG Concept, Hu Pao Creates a Win-win with Customers

Following the spirit of ESG in recent years, Hu Pao Industries Co., Ltd. not only has worked hard to deepen its expertise in the manufacturing of automotive, special, anti-loosening, and customized nuts, but also has introduced the concepts of digitization, energy saving and carbon reduction into its production lines, hoping to awaken the industry's awareness of crisis and to align with the international trend of net zero.

Recognizing the potential of U.S. automotive, construction, and standard nut markets, infrastructure opportunities, and the imminent implementation of new carbon emission policies, Hu Pao has partnered with U.S. largest distributor to supply hexagonal nuts, nylon nuts, and locknuts commonly used in the construction and DIY sectors, and also intends to expand its U.S. presence with local distribution channels. In addition, in response to the gradual recovery of the U.S. booming market, Hu Pao, which has been working with the supply chain of global automobile manufacturers for years, expects to play a strong backing role for U.S. EV industry and aims to increase the proportion of U.S. sales to 45%. In addition to a wide range of popular products and weld nuts, Hu Pao is also able to extend its supply of other quality products. 60% of Hu Pao's global exports are automotive nuts, and six specifications of nuts are used by Tesla, the leader in EV.

The new factory built in 2021 is fully compliant with international automotive standards, and the manufacturing equipment has been successively upgraded with the introduction of ERP software, MES system, forming machine pressure sensor, intelligent energy control system, etc., as well as optical inspection machines and Keyence 3D inspection instruments purchased to meet the high precision inspection requirements for automotive/special parts. Hu Pao is leading the Taiwan industry to obtain the ISO14064-1:2018 GHG Inventory Verification in 2023 and

Fong Yien's Shoulder Eye Bolts Pass U.S. Lab Tests

Having excellent cold and hot forging technology, Fong Yien Industrial Co., Ltd. mainly produces DIN 444 eyebolts, JIS B1168/1169 shoulder eye bolts & nuts, special eyebolts, and special cold/hot forged fasteners. For more than 40 years, it has obtained orders from many European and Japanese customers due to its excellent quality and relatively reasonable prices. In 2020, it started the production program of ASME B18.15 shoulder eye bolts to expand the U.S. market. Although it used to produce products of European and Japanese specifications, with this new shoulder eye bolt, Fong Yien is able to show the world its expertise in product development and its ability to meet the needs of customers in different market segments.

Fong Yien has just started its sales into the U.S. market recently, but has already established a warehouse there. With the changing consumption habits of buyers in the market during the epidemic and the experience of successfully working with customers in the EU and Japan, Fong Yien is gradually increasing its sales proportion in the US market. In addition to strengthening links with local distribution channels and leveraging B2C and B2B advantages, it is also showing positive performance in e-commerce channels. It is also selling products with its own brands through Amazon.com to strengthen its brand awareness in the N. American market.

In terms of processing, Fong Yien is one of the few companies in the market that has both hot forging and secondary processing facilities. The CNC machines in the factory, which can accurately control the quality of secondary processing, help it create better precision and surface finish than its competitors, and it has even successfully entered the motor production and rigging industries, which require high load capacity and safety coefficients for shoulder eye bolts.

INTERNATIONAL
FASTENER
EXPO

Booth No.
677

continues to develop innovative products with high CP value and competitiveness and provide fast delivery and flexible customization services. In addition, Hu Pao also holds IATF16949:2016, D&B, and ISO 9001:2015 certifications, and has channeled external resources from industry, government, and academia to build a green benchmark company in line with ESG development trends.

"The U.S. market is like a big machine, and we want to be the most valuable supplier of small nuts in it. At the IFE this year, we hope to find more like-minded partners to contribute to the U.S. fastener market," said Bill Wang, General Manager.

INTERNATIONAL
FASTENER
EXPO

Booth No.
746

"Diversified product sourcing is a global trend to diversify risks, and Fong Yien is able to provide customers with excellent quality, relatively reasonable prices and stable supply efficiency. In addition to having sufficient inspection capacity, its latest ASME B18.15 shoulder eye bolts have also passed the US lab test certification, so customers definitely can place orders with confidence," said Wes Chuang, Sales Manager.

Spring Lake Moves Toward Particle Cleanliness and Low Carbon Transformation to Enhance Fastener Competitiveness

INTERNATIONAL
FASTENER
EXPO | Booth No.
1074

Spring Lake Enterprise Co., Ltd. is a professional fastener manufacturer specializing in export sales, and also has rich experience in international trade and fastener production expertise.

For more than 4 decades, it has attracted many customers for stable and long-term cooperation. In addition to standard products, it is also able to cooperate in developing differentiated solutions according to customers' diverse requirements. Its products include a full range of standard/customized C parts and those produced by multi-stroke machines for

Article by Gang Hao Chang, Vice Editor-in-Chief of Fastener World
Copyright owned by Fastener World

automotive, construction, and electronic applications. M1.8/M2 screws with anti-loosening patches on threads are one of the mainstays of its production. Spring Lake's in-house production advantages allow it to have full control over the entire production process, while also ensuring stable product quality level and fast delivery.

In terms of particle cleanliness, Spring Lake is able to provide cleaning service and inspection analysis report for automotive fasteners, especially for the EV. Requirements can be fulfilled according to ISO 16232 and VDA 19.1. Both of which are widely recognized and used in the automotive industry to ensure the cleanliness and quality of automotive parts. Spring Lake has already supplied cleaned parts to BorgWarner, a leading U.S. automotive parts supplier, through its valued partner, and has received market recognition for its remarkable quality.

In view of the fact that CBAM and net zero are gradually becoming the main development trends around the world, Spring Lake is currently on its way to the low-carbon transformation and plans to apply for ISO 14064 and other related certifications in the near future, hoping to further enhance the competitive edge of its fastener products in the world.

"Even though the global manufacturing industry is in a slowdown, supply chain disruptions happened amid the pandemic, and the energy crisis is caused by sanctions against Russia, companies around the world are beginning to reconstruct secure supply chains and de-globalize to ensure smooth production and defend national security. Taiwan fastener industry features exceptional quality, skilled technology and reasonable prices, it definitely has a fighting chance. Accordingly, we look forward to reaching more potential buyers through the opportunity of IFE this year!" said Spring Lake Manager Daniel Chen.

Evereon Industries, Inc.

With almost 30 years of experience in producing stainless steel hose clamps, EVEREON has earned a good reputation from our customers. Our products are divided into three series, the German type (Embossed Worm Gear) hose clamps, the American type (Worm Drive) hose clamps and the other customized clamps (Ear Clamps, CV Joint Boot Clamps and Tools).

The first series, our YDS embossed worm gear hose clamps, which are popular, economical and precision-engineered to be used in many general applications. Sometimes called worm drive hose clamps, non-perforated band hose clamps, or German type hose clamps. They are produced in accordance with the DIN 3017 and RoHS & REACH standard. The smooth non-perforated band and flared edge prevent soft silicone hoses from shearing and fraying during installation. Material and clamping range are stamped on the band. Embossed worm gear hose clamps are available in W2, W4 and W5 stainless steel material, and available in 9mm and 12mm band widths.

Besides above standard worm gear hose clamps, we have one butterfly hose clamps, which is designed for DIY, home and garden applications. No tools are required. The handle is designed to resist aging and fatiguing under outdoor. The smooth non-perforated band and flared edge prevent hoses from shearing and extruding during installation.

The second series - YDS worm drive hose clamps are popular and economical to be widely used in industrial, automotive, and agriculture applications. Sometimes called worm gear hose clamps and American type hose clamps. There are also four choices - band width 9mm & 12.7mm, high torque & 14.2mm. The 1/2" width punched perforated band enables clamps to be installed easily and strongly held. Material is stamped on the housing and clamping range is stamped on the band. Worm drive hose clamps are available in carbon steel screw, 430 S.S. screw, all 300 S.S. and all 316 S.S. material.

As for the customized clamp, besides the above clamps mentioned, we still have the Micro Clamps, Bridge Clamps, Lined Clamps, Band Clamps, Cable Ties and TT Heavy Duty Clamps for customers' choices.

To be a reliable supplier of hose clamps is our vision. We continue to develop more quality products and enhance our services to meet customers' requirements. Welcome to cooperate with us and create more value for your business.

A-Stainless International

Double Spiral, Square Thread, Triple Thread Screws

INTERNATIONAL
FASTENER
EXPO | Booth No.
663

A-Stainless in partnership with their factory Fastex Industry Co., Ltd in the last 23 years has introduced a series of innovative screw products to the fasteners market. They first introduced the Square Thread Screws that feature very low driving torque for hard wood, metal, plastic and concrete applications. This type of thread form back in 2000 was a very new concept, the very first of its kind in the market place that soon fetched market footholds in North America, Europe, Australia and Japan.

The square thread they have learned over the years besides being good for hard wood is best suited for metal applications. In the case of aluminum window frames, the driving torque reduction is well above 50 % which is significant enough to do away with head breaking problems when Austenitic, i.e., 304, 305, 316 (A2 or A4) tapping screws are used for aluminum windows.

Two years after the Square Thread Screws, they introduced the Double Spiral Screws, also meant for hard wood applications, again featuring a general 30-40 % drive-in torque reduction versus the regular Type 17 thread cutting screws. In the same year they came up with the Triple Thread Composite Decking Screws, a much improved version over what was available in the market then. Their version has a small trim head with triple threads, i.e., 3 portion threads of left, right and left thread design. The trimmed small head ensures that the screw head sits flush against the surface of the composite decking while the triple threads compress the plastic spiral waste materials from emerging, i.e., kept under the decking. Built on the square, double spiral and triple thread styles, they have used these variables to come up with various screw versions to suit the specific needs and requirements of their customers.

In the last three years, they have had the latest product, namely the Milled Point Self Drilling Screws made with milling machines designed and made by their team. They have chosen to make the 6-cut milled point instead of the regular forged point for reasons of the very neat, sharp and consistent cutting blades. The milled point is preferred due to its stability and consistency while drilling thicker metal sheets that require No. 4 or No. 5 drill points.

A-Stainless is committed to making special screw parts for a wide spectrum of different applications where special attention pertaining to thread designs, work hardening, heat treatment, plating and coating needs to be taken. They welcome inquiries especially those that call for specific performing features.

JC GRAND

Excellent Fastener Manufacturing & Service Since 1978

Ad at page 10

INTERNATIONAL
FASTENER
EXPO Booth No.
742

JC Grand is a leading manufacturer and exporter of industrial fasteners and metal hardware components. Since 1978, JC Grand has been serving customers globally with an extensive line of high quality screws, nuts, bolts, washers, anchors, and customized hardware products from its wholly-owned factories in Taiwan and China. All of its locations are ISO 9001 certified, and singularly focused on delivering products and services of exceptionally consistent quality to its clients worldwide.

Certified Facilities and Full-Fledged Capabilities

The company consists of a main office in Taipei, three ISO-9001 and IATF-16949 certified production facilities in Kaohsiung, Taiwan, and an 800,000 square feet vertically-integrated factory in Zhejiang, China, all connected and managed by the same SAP ERP system. In addition, JC Grand owns and operates an A2LA certified (ISO-17025) mechanical testing laboratory in Kaohsiung. Technical staff and internal production cover fastener design, cold heading, self-drilling point forming, continuous line heat treatment (neutral, carburizing and carbo-nitriding), optical and roller sorting, washer assembly, custom packaging and logistics.

New Surface Coating Factory Opened

As of 2022, JC Grand has opened and is currently operating a new, surface coating factory in Kaohsiung focused on the prevention of fastener corrosion in severe outdoor environments. This facility has two principal workflows and equipment: the base coating cold welds, diffuses and seals proprietary multi-metal powders onto the fastener substrate, and the other applies thermoset organic topcoats and friction modifiers on top of the base coat via automated dip-spin lines.

It dispatches more than 300 containers (4500+ tons) of fasteners every month to over forty countries and employs more than 300 sales and factory personnel. It is equipped to produce both standard and customized fasteners that meet all industrial requirements.

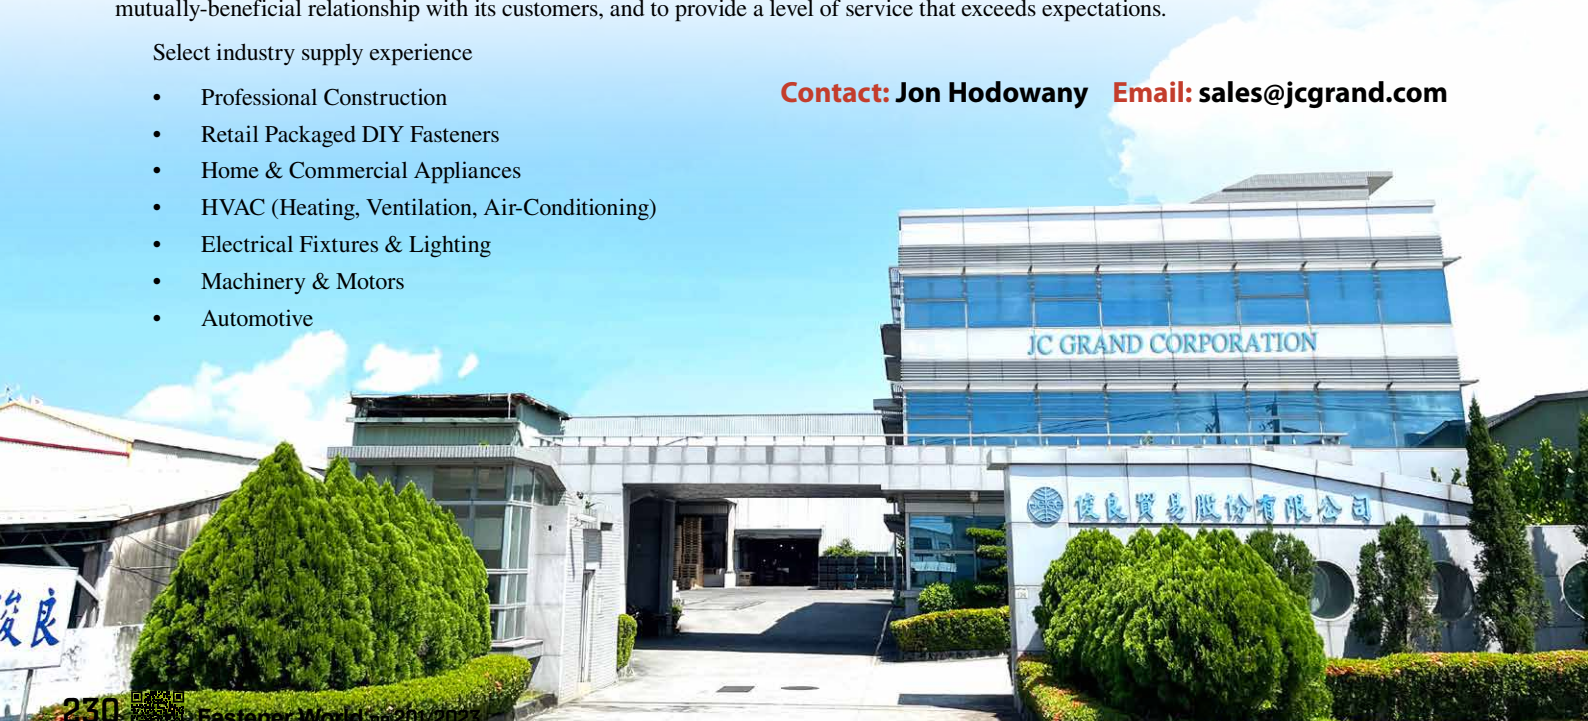

Worldwide Service for Various Industrial Demands

Whether you are an industrial manufacturer, OEM or wholesale distributor, professional contractor supplier, or retail-focused operation, it understands your needs and has the experience and capability to consistently meet them. Its goal is to establish and maintain a long-term, mutually-beneficial relationship with its customers, and to provide a level of service that exceeds expectations.

Easylink Offers High Quality Service with AIoT

Touch panels located at each machine

Easylink Industrial Co., Ltd is a high-quality (IATF-16949, ISO 9000, ISO 14001 and VDA 6.3) fastener manufacturer with plants in Taiwan and Vietnam. Founded in 1992, Easylink has over 30 years of experience supplying custom fasteners and stamping parts to the automotive, electronics, electrical, construction and furniture industries.

Throughout its existence, Lerry Tsao, the president of Easylink, has consistently challenged all employees for continuous quality and process improvements. Driven by these principles, Easylink opened a new plant and offices in Kaohsiung, Taiwan in 2018. This new facility is highly automated and draws heavily on the benefits of AIoT and Industry 4.0. The plant utilizes a five-story vertical automated warehouse system (AS/RS). Machine adjusters manage machine setup utilizing the touch panels located at each machine. Operators pull material from the warehouse system using these same touch panels. The material is delivered to the production machine by robotic buggies. Likewise, finished product is delivered back to the warehouse by similar automated buggies to await secondary operations if required.

With quality in mind, all production gauges have been equipped with wireless capabilities. This enables their connection to the plant's industrial internet. Utilizing this capability, all production measurements are instantly communicated to the plants SPC software. The system will immediately detect an erroneous measurement and lock down the faulty equipment until corrective action has been taken. Easylink also maintains a TAF certified laboratory that is capable of making most customer PPAP and quality measurements.

To ensure the PPM requirements of its customers, Easylink has established an engineering team that has built over 50 optical sorting machines. Many of these machines are capable of 360-degree measurements to ensure that the entire fastener surface is inspected.

Last but certainly not least, Easylink goes the extra mile to enhance and uphold the standards of quality and consistency by producing its own tooling in-house. This strategic approach not only guarantees comprehensive documentation for tool replacement but also offers the added advantage of scheduling flexibility. These measures exemplify our steadfast dedication to excellence, a core value that resonates throughout every individual within the Easylink team.

Sacma Group

Sacma app 2023

Sacma Group will be attending IFE 2023 from October 9-11, 2023 in Las Vegas. The leitmotiv of Sacma Group is to innovate steadily and provide the most reliable range of machines making the customers more competitive in a continuously evolving market.

As usual Sacma Group will welcome all the actors of the fastener world in its booth for an exhibition dedicated to its four brands Sacma, Ingramatic, HS Aspe and Tecno Lift.

Sacma, designer and manufacturer of cold and warm forming machines, will introduce the new generation of wire feeder driven by torque motors named "S-Feed 2.0" and new features for large parts formers sizes 4, 5 and 6 which will be available within 2023. These features have been designed to extend the limit of the standard warm and cold forming machines. Sacma will also introduce its new App. Industry 4.0 which has been implemented with different levels to fit better the needs of the customers according to their ERP system and production organization. Three packages are now available : Industria 4.0 BASIC, ADVANCED and FULL ADVANCED.

SACMA GROUP

HS ASPE T10-S

The Ingramatic division will give a better understanding about the undisputable capacity to design modular machines, with the introduction of two new modular units which can be integrated into the machines: the assembly unit for bushing and ferrules, and the rotary thread rolling station for multi shape parts. The rotary thread rolling station is already available with three different sizes : RR12, RR16 and RR20 having respectively the maximum capacity for rolling M12, M16 and M20.

The brand HS ASPE is the division of the group providing secondary operation machines to run pre-formed parts with a range of technologies which is consisting of tapping machines, combined machines, transfer machines and multi spindle turning machines. HS ASPE will introduce the new generation of automatic tapping machine model T10-S running parts up to M10. The T10-S is based on the reversible spindle architecture, mechanically driven by lead screws. Internal threads, within the range M2 to M10 can be executed with standard taps in both technologies, cutting and forming. Precision in operation is achieved by means of the structural rigidity of the frame and the very fine design and engineering of the positioning/clamping devices. Orthogonality and concentricity as well as the other dimensional/geometrical features, are so lifelong guaranteed.

Tecno Lift is the company of the group in charge of the design and the manufacturing of all ancillaries for the Sacma Group machines to load, feed and convey parts. The solutions are also available for other application or existing machines already installed to the customers.

Sacma Group staff will be pleased to welcome visitors at IFE 2023, to explain better all the new technologies and the capacity to support all the customers around the world. www.sacmagroup.com

Luna's Light

INTERNATIONAL
FASTENER
EXPO Booth No.
773

Luna's Light is a Taiwan-based specialized precision fastener manufacturer and supplier, having two CNC turning factories in Taiwan and also supplying CNC milling parts. Our products are mainly applied to automotive parts, machines and many other industries. With 36 years of CNC producing experience, Luna's Light supplies the best quality and excellent service to customers.

We manufacture OEM customized fasteners per drawings and samples. Our turning product capacity is $\phi 2\text{ mm} \sim 42\text{ mm}$ and 250mm in length. Our milling parts are without limited diameter and length.

We also supply bolts, nuts, stamping parts, assembled parts and any kind of OEM products made from materials like steel, stainless steel, brass, copper, aluminum, titanium and any other materials we can buy.

We work with many Taiwanese associate fastener makers. By combining outsourcing production capacity, Luna's Light not only combines qualified merchandise, but also provides global customers with the most comprehensive range of products (including CNC parts, bolts, nuts, screws, washers, stamping parts, assembled parts, pins and none-metal parts).

Contact: Ms. Ball Lin
Email: sales@visdomsupply.com

We supply import & export agency services for domestic and overseas companies, such as goods and services price quotations, bidding quotations, sales promotion and distributorships in the metal hardware field.

We can provide documents like Certificate of Origin, Inspection Report, raw material Mill Sheet, PPAP 3 and IMDS data.

We offer one-stop-shopping & cost-saving service and provide end-users with high quality products at competitive prices, helping customers get more business opportunities. We also have stock on specific products for customers.

In order to offer more competitive service, we also have an office in Germany to meet European customer's request. Through our products and services, we hope to set more additional value service to work with customers.
